Summary statement

Product Manager with 8 years of experience in EdTech and digital B2C/B2B products. I launch and scale products with a focus on sustainable unit economics and user value. Founded and grew Y-Boost from scratch — an EdTech service for IT professionals. Found product-market fit and shaped a unique value proposition based on JTBD interviews. Increased trial-to-paid conversion by 38% by focusing on users' career goals.

I work according to Lean and Agile principles, relying on behavioral analytics, A/B testing, product discovery, and unit economics. Built supply-side operations and managed a distributed team of 5, tripling operational capacity without increasing costs.

Skills

Jira | Confluence | Miro | Figma | Notion | SQL | Google Analytics | Tableau | Zapier | Git | React | JavaScript

Experience (8 years)

Y-Boost

Product Manager & Founder

Remote

October 2021 – Present

Y-Boost is an online service for IT professionals learning English through practice and real-world professional cases.

I'm responsible for product strategy and revenue.

- Increased ARR by 1,088% (from \$10K to \$118.8K), with a client base of 300+ VIP B2C users across 8 countries.
- Built the MVP using Astro/JS/Tailwind, reducing development costs by 90%.
- Boosted paid conversion rate by 420% by improving the product funnel.
- Switched to a coaching model — reduced churn, increased retention to 1.8 years, LTV exceeded \$1,200, PR and NPS above 87.
- Achieved product-market fit by increasing trial-to-paid conversion by 38% through a JTBD-driven approach and developing a new value proposition.

Skyeng

Mentor

Remote

October 2017 – October 2021

Worked with an IT audience at Skyeng, using teaching as a tool for product discovery and customer development.

- Worked with an IT audience at Skyeng, using teaching as a tool for product discovery and customer development.
- Conducted over 2,000 one-on-one sessions, helping professionals improve their skills for interviews and day-to-day work.
- Developed and tested career-oriented modules (mock interviews, presentations) that later became the foundation for Y-Boost.
- Maintained student satisfaction above 95% and achieved high retention rates.
- Supported the career growth of 150+ students, many of whom transitioned to international job markets.
